

UK

# A growing FBO network

Global Trek Aviation is a multi-award-winning UK FBO network

## Vital statistics

**Airports:** Belfast International Airport and Cardiff International Airport  
**Operating hours:** 24/7  
**Services:** Full ground handling services, customs and immigration, fueling, VIP catering, direct ramp transfers, private lounges

Launched in 2015, Global Trek Aviation introduced its first full service FBO at Belfast International Airport (EGAA). 2019 saw the successful launch of its second state-of-the-art FBO jet centre and operations at Cardiff International Airport (CWL).

Operating at two strategic capital city airports in Northern Ireland and Wales has given Global Trek Aviation a significant footprint within the UK business aviation marketplace. As the market leaders in Northern Ireland since 2016 and with a wealth of experience behind them, it is evident that Global Trek Aviation intends to repeat this success in Wales.

### Lower carbon footprint

Global Trek Aviation invested heavily in designing and building environmentally friendly state-of-the-art private jet centres. The goal to reduce the carbon footprint of the facility continues through to its day-to-day operation and to the aircraft ground support servicing equipment.

### Our team – your safety

In a highly competitive market, Global Trek Aviation has been very successful in attracting new business to its locations. The ability to respond quickly to changes and be flexible to clients' needs has been identified as one of the core strengths of the company. In order to undertake this customer driven approach, the Global Trek Aviation team have been trained to the highest level within a safety culture and customer service capacity.

Every member of the Global Trek team is trained and certified to marshal, refuel an aircraft, carry out all the aircraft servicing and to work in operations to provide flight support and flight planning services. This allows the team to react quickly to client requests and to increase their overall safety awareness around an aircraft, where there may be many tasks taking place at any given time. This is achieved with comprehensive in-house training, as well as, NATA Safety 1st Professional Line Service Training, and aircraft specific training.

Global Trek know that the people make the difference and the company demonstrates this by focusing on ensuring its people are the best and investing heavily in supporting their team with this.

### Growth from excellence

Amongst many accolades Global Trek's FBO in Belfast won the FBO of the Year 2019 award – Northern Ireland. The company adopts the philosophy that the only way to guarantee high end service levels, is to be self-sufficient, therefore all

aircraft ground handling/servicing and aircraft refuelling is performed in-house. This ensures a very cost-effective delivery of service, at a time and manner to suit the customer, as the core priority.

This year at Cardiff International Airport, Global Trek has repeated the process that made them so successful in Northern Ireland. It built a brand-new state-of-the-art and unrivalled jet centre at the airport. It invested heavily in aircraft ground support equipment and refuelling capabilities, in order to guarantee a client service. This introduced the first dedicated full service FBO in Wales, with in-house refuelling capabilities, in-house ground support equipment, and a world class jet centre, with private lounges, private offices, integrated security screening and crew rest areas. As well as a refreshment bar, shower facilities, UKBF clearance and much more that the corporate jet clients and crews expect and are accustomed to.

With its corporate offices in Scotland, providing management support and remote flight support services, the Global Trek Aviation FBO network is expected to continue its growth well into the future.

Business Airport International readers can benefit from a 50% discount on handling at both Global Trek Aviation locations at Belfast International Airport and Cardiff International Airport when quoting CG007. ○
